

Microsoft Learn Knowledge Agent

AGENTIC AI CHAMPS

Agent behaves like a digital learning coach

CAPGEMINI - MICROSOFT AGENTIC AI HACKATHON 2026

Microsoft Learn Knowledge Agent

**Multimodal AI Agent for
Personalized Learning
in Microsoft Teams**

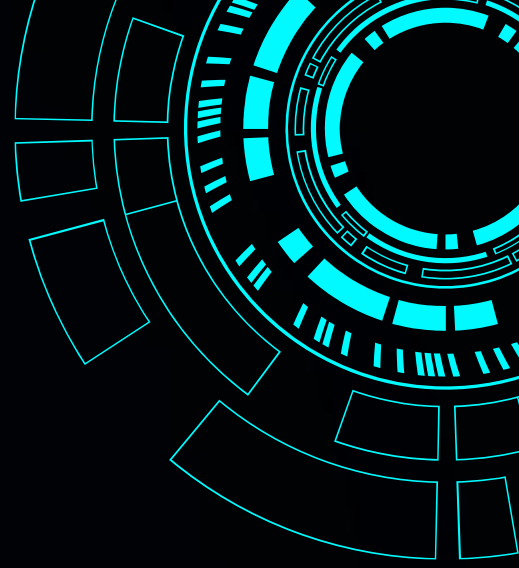

Chat + Voice AI Experience

Powered by Azure AI Foundry + MCP

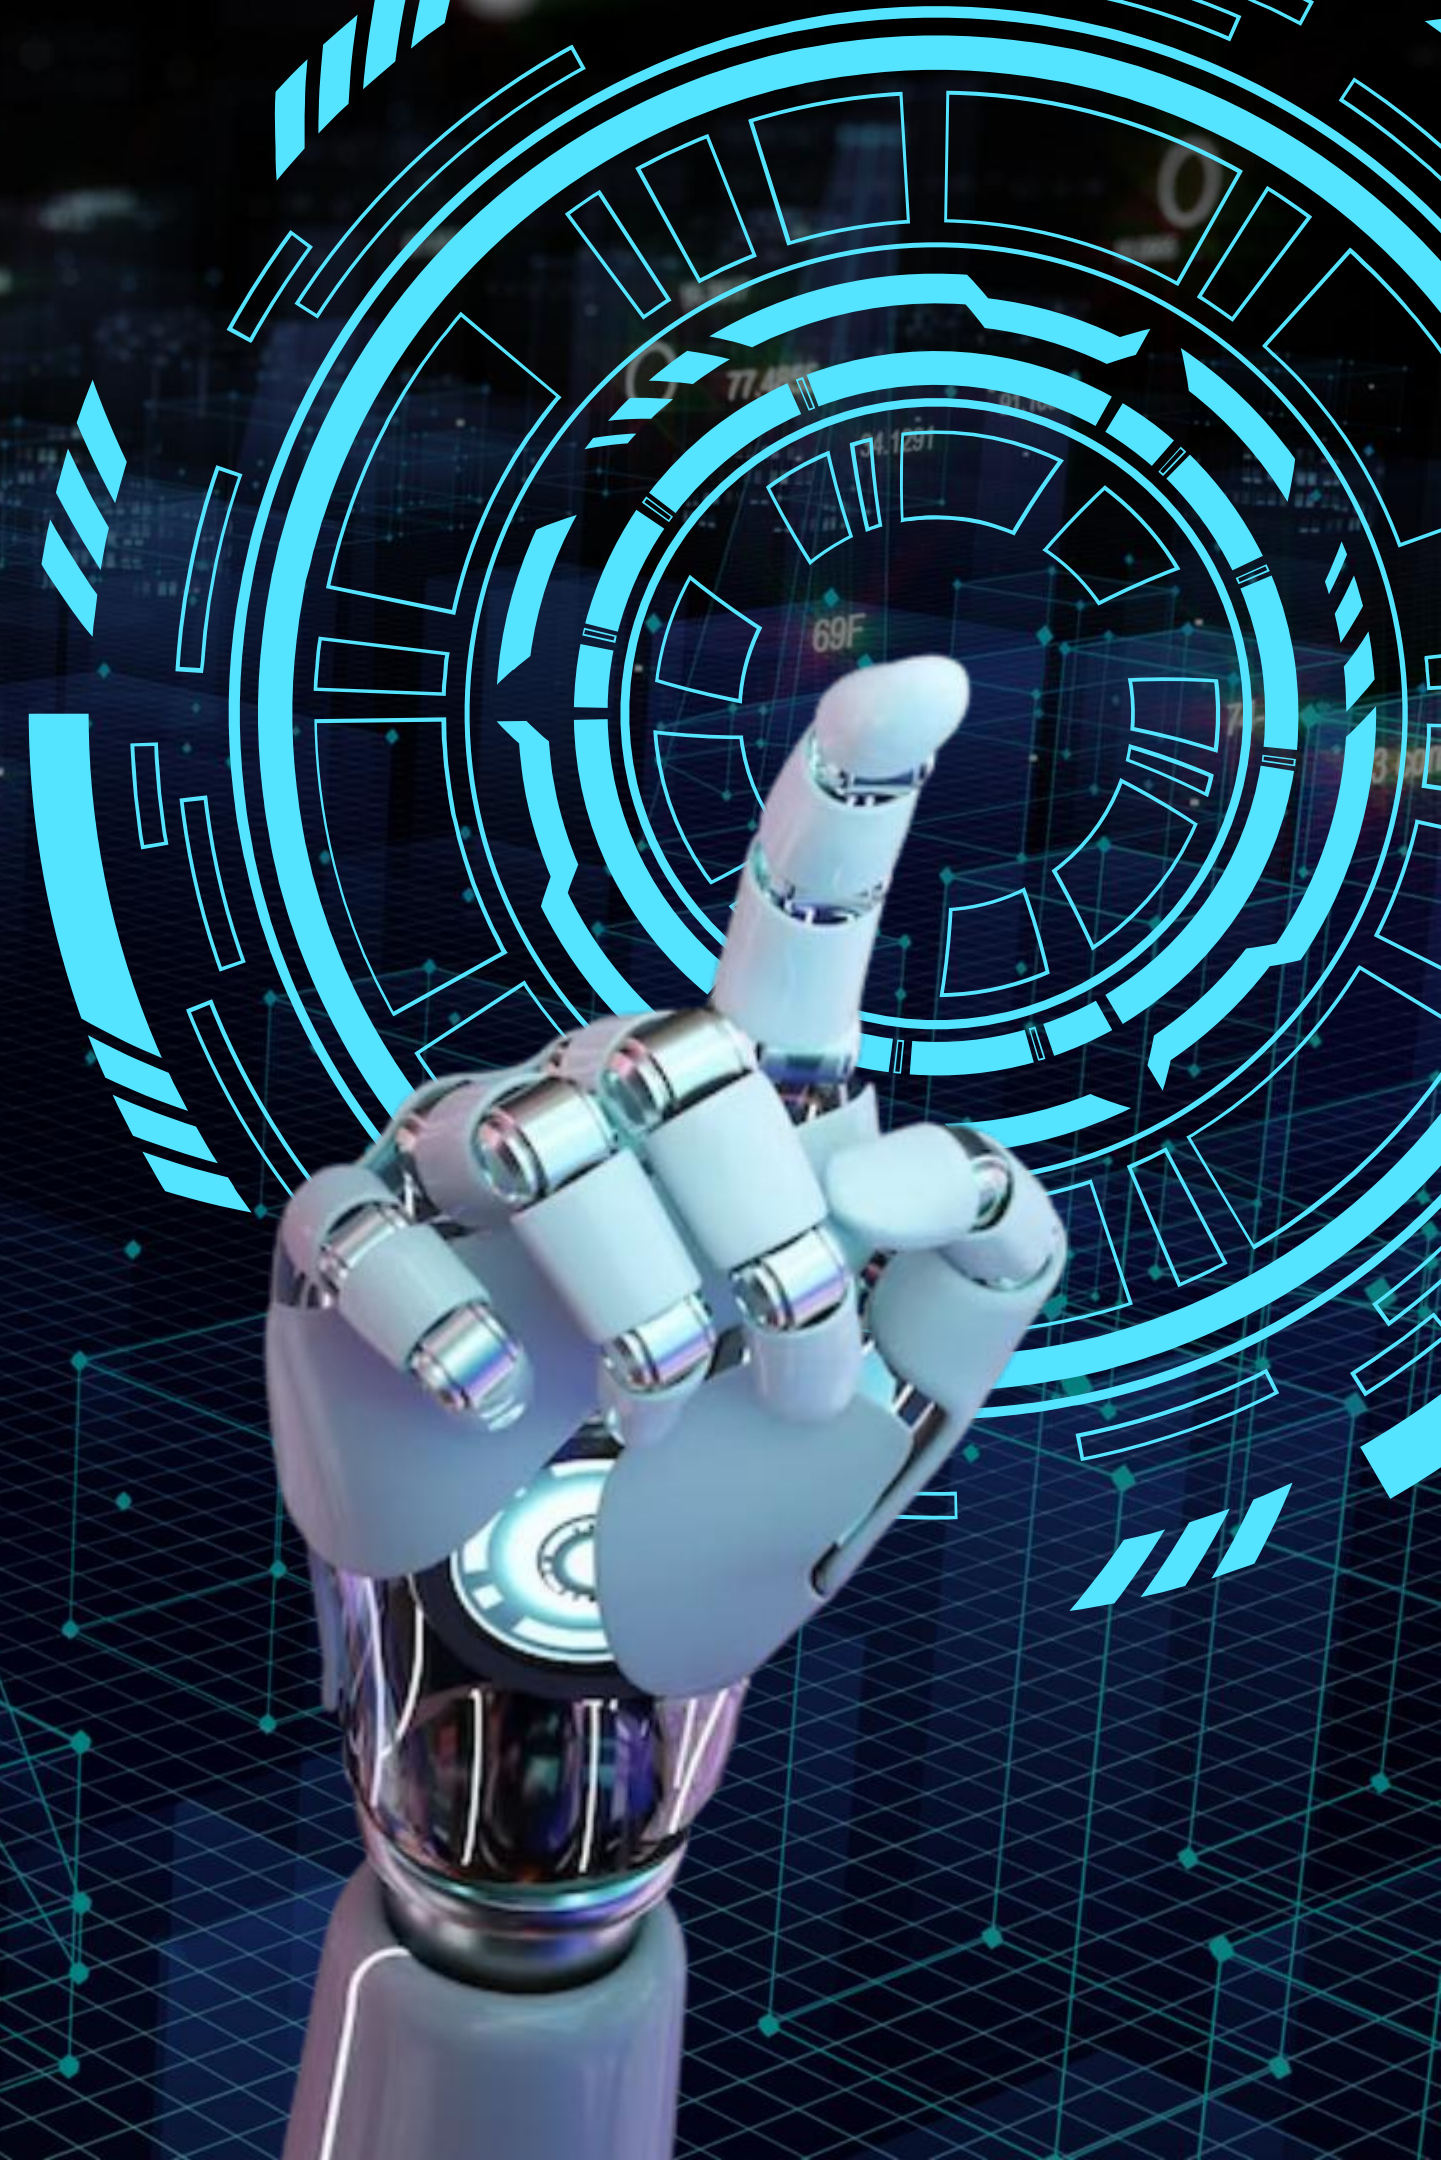

**Personalized Learning Path Generator
through Microsoft Learn**

Problem Statement

- **Employees still face fragmented, manual, and inconsistent support experiences across Microsoft learning**
- **services. Repetitive tasks and disconnected systems slow productivity and limit personalization. AI-powered, multimodal, and proactive agents**
- **are needed to unify onboarding, workplace interactions, and knowledge access into a seamless, anticipatory employee experience.**

BUSINESS VALUE

What This Means for the Business

70% Reduction in time spent searching		3× Faster onboarding for new employees	24 / 7 Knowledge available
 Expert knowledge, democratised Every employee has access to the same quality of answers as your top subject-matter experts.		 Secure and compliant Built entirely on Microsoft Azure — data stays within your tenant, governed by your existing policies.	
 Scales with your organisation Handles hundreds of simultaneous queries with no degradation. Works for 50 or 50,000 employees.		 Works where people already work No new tool adoption. Lives inside Microsoft Teams — the app your employees already use every day.	

We're Ready to Build This

To proceed with a 6-week proof of concept.

Weeks 1-2

Foundation

Connect to Teams, set up AI Infra,
work on high-level design

Weeks 3-4

Pilot

Test with a small group, gather
feedback, tune responses

Weeks 5-6

Refine & Demo

Fix issues, add voice input, prepare
full executive demo

What We're Asking For

- ✓ 6-week proof of concept
- ✓ Access to 2-3 internal knowledge sources (SharePoint / documents) and Microsoft Learn MCP
- ✓ A small pilot group of 5-10 volunteer employees
- ✓ Azure subscription or confirmation of existing licencing

The Opportunity

This is low-risk, high-reward. We're using technology our organization, hosted in your own Microsoft environment, with a clear 6-week timeline to prove value.
